

Innovative Packaging Solutions.

SlimPack™

SlimPack: a novel solution for pharmaceutical packaging of solid oral-dose drugs.

The SlimPack solution introduces an inventive blister packaging design that offers pharmaceutical companies cost-cutting convenience:

- Up to 50% savings on packaging material
- Up to 50% savings in storage volume
- Substantial savings on transportation expenses
- Environmentally friendly-reduces packaging materials

SlimPack's streamlined size takes standard packaging to the next level.

The compact size means more SlimPack units can be shipped in the same volume required by larger, standard-sized packages. After arrival at the destination warehouse or retail store, SlimPack saves shelf space yet retains ample area on the package for labeling information and advertising elements.

OneByOne™

Specially designed to fit SlimPack, OnebyOne is an easy-to-use method for dispensing a single pill or capsule. The package also provides a convenient slot for inserting the medication leaflet.
